PROJECT
STS CINEMAS
MOVIE TICKET
BOOKING

THE HINDU SENIOR SECONDARY SCHOOL

BONAFIDE CERTIFICATE

This is to certify that project on Booking Movie Tickets with python is the bonafide work of Shreya.V, Theja Arun and D. Senthamizh Selvi in the Computer Science department of THE HINDU SENIOR SECONDARY SCHOOL, Chennai-600 020, during the year 2023-2024.

ACKNOWLEDGEMENT

We thankfully acknowledge the help and parental guidance given by our computer science Teacher Mrs. Dhanalakshmi who helped us in understanding the subject.

We also thank our Principal, Mrs. Lakshmi Arulaalan, and our Vice Principal Mrs. C. Kala for their constant support and encouragement whom without, this project would not have been possible.

Thank You

INDEX

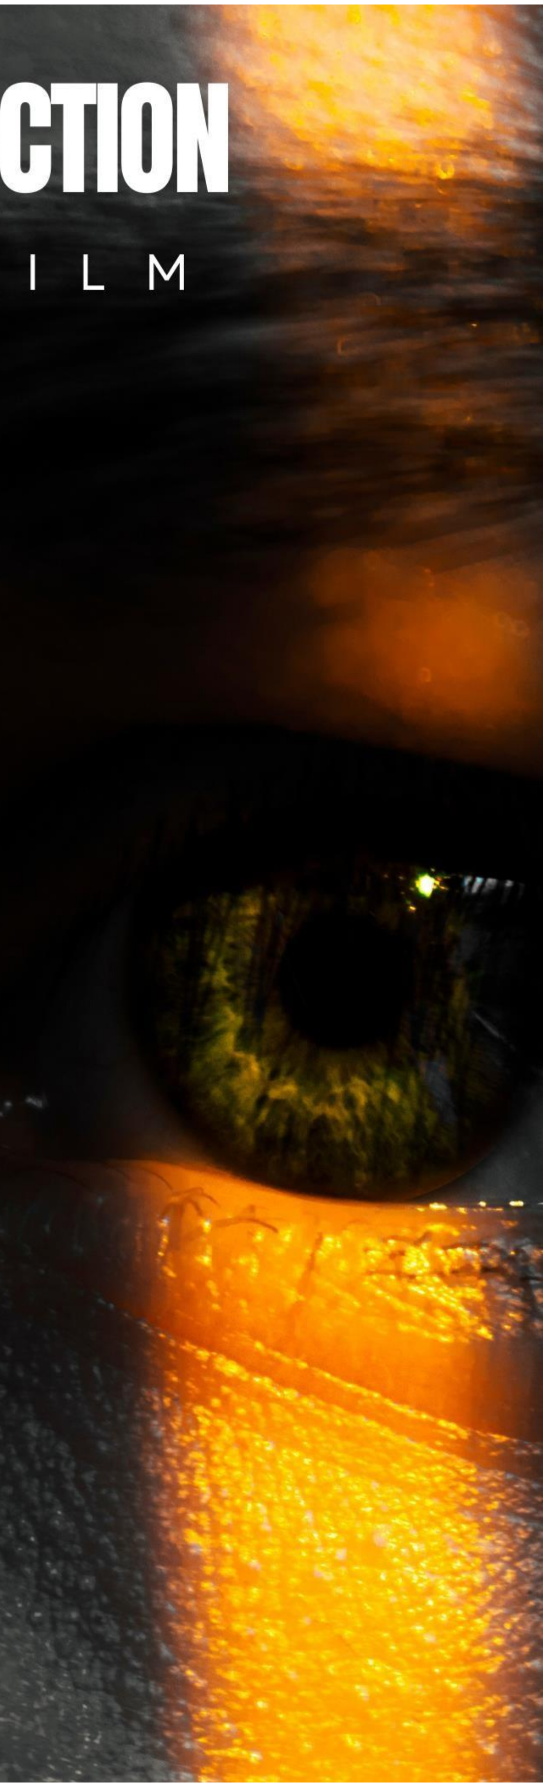
INTRODUCTION

T H E F I L M

The project presented is a compilation of Movie Ticket Booking which is inputted into a menu driven program. This program allows you to choose which movie ticket should be booked.

This code is made with the use of Python IDLE and VS Code. The confirmation of ticket message is given.

The movie ticket booking consists of snacks, beverages, area, theatre, time, number of tickets.



SOFTWARE AND HARDWARE REQUIREMENTS

Hardware requirements:

A personal computer or laptop with the following requirements:

- x86 64-bit CPU (Intel / AMD architecture)
- 4 GB RAM
- 5 GB free disk space

Software requirements:

- Windows 7 or 10 Mac OS X 10.11 or higher, 64-bit Linux: RHEL 6/7, 64-bit (almost all libraries also work in Ubuntu) Python Idle(version 3 or above) MySQL Workbench 8.0 CE MySQL Command Line Client
- Python Idle (version 3 or above)
- Visual Studio Code
- Base64 online converter
- Pygame Module

MODULES_USED

- Pygame
- Base64
- IO
- Sys
- Os
- Sql Connector
- Time

TESTING_TECHNOLOGY

The code for this project was developed using Python IDLE and Visual Studio Code. We did intense testing to ensure zero major bugs and issues cropped up. Repeated running of the same code and debugging was done to resolve most of the bugs. No other specialized software was used for this purpose. The final code was checked in Python IDLE after completion.

CONCLUSION

This project was a very great opportunity for us to learn new concepts and get the experience of many situations.

Through the world of python we create the possibility for the user to create and even book the tickets they build.

This project has very much contributed to our knowledge in the programming language. We would like to thank our teachers again for giving us such a wonderful and creative opportunity.
